### **DETAILED ACTION**

1. The responses filed September 13, 2000 and October 20, 2000 along with the amendment filed April 24, 2000 have been entered.

#### ***Information Disclosure Statement***

2. The information disclosure statement filed July 2, 1998 (paper #10) has been received and the references listed thereon have been considered.

#### ***Drawings***

3. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on April 24, 2000 have been approved-in-part.

The drawing corrections to the pages containing Figures 1-4 and 8 have been **approved**.

The drawing correction to Figures 6 and 7 are not understood and have not been approved. It appears that numerals 39 and 39' both indicate the same working flight.

#### ***Claim Rejections - 35 USC § 112***

4. Claims 3, 4, 7, 8, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3724

In claim 3, line 5,<sup>✓</sup>“the guide rail” is vague and indefinite as to which guide rail; in line 6,<sup>✓</sup>“each chain” lacks positive antecedent basis, particularly since only one chain has been set forth.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 7, 11 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiley.

Wiley discloses a fence, and a fence and cutting table with every structural limitation of the claimed invention including an elongated cutting guide (e.g., 23); motion conditioning members/endless chains (e.g., 148) including a movable working flight (e.g., the top portion of 148 which extends between sprockets 150 and 152); aligning lugs (e.g., 146) releasably interconnecting the cutting guide to the working flights for movement therewith; a locking mechanism (e.g., 155); and base blocks (e.g., 142, 144).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 4, 8, 9, 10, 12, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiley.

Regarding claims 8 and 16, Wiley discloses a fence, and a fence and cutting table with almost every structural limitation of the claimed invention but lacks a chain-receiving groove in the base blocks. However, the Examiner takes Official notice that it is old and well known in the art to provide additional structure, such as a bracket which extends from each end plate, across the chain and down the inside of the chain, for various known reasons including additional structural stability. Therefore, it would have been obvious to one having ordinary skill in the art to provide such a bracket thus forming a chain-receiving groove in the base blocks for the well

known benefits including that described above (it is noted that such a configuration would result in the aligning lug being disposed within the chain-receiving groove.

Regarding claims 4, 9, 10, 12 and 17, Wiley lacks a lug adjustor. However, the Examiner takes Official notice that it is old and well known in the art to adjustably mount connecting members to finely adjust one member with respect to another for various reasons including to make adjustments due to changes caused by environment, temperature, etc., and to reduce required manufacturing tolerances. Therefore, it would have been obvious to one having ordinary skill in the art to provide a lug adjustor on the device of Wiley for the well known benefits including those described above.

#### ***Response to Arguments***

9. Applicant's arguments filed October 20, 2000, September 13, 2000 and April 24, 2000 have been fully considered.

#### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
